Art Unit: 3611

1. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

2. Claims 1-19 are finally objected to because of the following informalities: In the preamble of claims 1 and 11, "a handlebars" is incorrect. Appropriate correction is required.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 2, 8 and 13 are finally rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 2 and 13, the term "generally" is vague and indefinite.

Claim 8 appears to be identical to claim 5.

In claim 13, "its storage position" lacks proper antecedent basis.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 1-20 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Couture in view of Fahey.

Couture teaches a device having the structure substantially as claimed. The device includes a tow bar 80, a storage clip 182, a locking bar 188, a coupler 84, and a receiver 130.

Art Unit: 3611

Couture does not disclose that the tow bar is telescopic, and does not disclose the claimed "pivot block". Fahey, however, discloses a telescopic towbar for a bicycle. The towbar includes a pivot block 28. It would have been obvious to modify Couture by making the tow bar telescopic, as taught by Fahey, to allow for adjustment of the space between the leading and trailing vehicles. It would have also been obvious to include a pivot block, as taught by Fahey, to allow for up and down motion, and lateral motion, between the two vehicles (col. 3, lines 19-21).

7. Claims 1-4, 7, 10-15 and 18-20 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over Couture in view of Ripley.

Couture teaches a device having the structure substantially as claimed. The device includes a tow bar 80, a storage clip 182, a locking bar 188, a coupler 84, and a receiver 130. Couture does not disclose that the tow bar is telescopic. Ripley, however, discloses bicycle towbar which is telescopic. It would have been obvious to modify Couture by making the tow bar telescopic, as taught by Ripley, to allow for adjustment of the space between the leading and trailing vehicles.

8. Claims 5, 6, 8, 9, 16 and 17 are finally rejected under 35 U.S.C. 103(a) as being unpatentable over the combination of Couture and Ripley as applied to claims 1-4, 7, 10-15 and 18-20 above, and further in view of Adams.

As set forth above, the combination teaches substantially all that is claimed, but does not teach the claimed "pivot block". Adams, however, discloses a similar device including a pivot block 54 (fig. 2). It would have been obvious to include a pivot block, as taught by Adams, to allow for movement about a horizontal axis and a vertical axis.

9. This is a continuation of applicant's earlier Application No. 09/381,117. All claims are drawn to the same invention claimed in the earlier application and could have been finally rejected on the grounds and art of record in the next Office action if they had been entered in the earlier application. Accordingly, **THIS ACTION IS MADE FINAL** even though it is a first action in this case. See MPEP § 706.07(b). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no, however, event will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

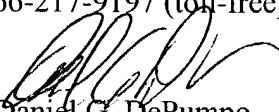

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Daniel G. DePumpo whose telephone number is 703 308-1113.
